Logs

Test Case ID: TC_DEPOSIT_001
Title: Successful deposit within daily limit (Positive)
Preconditions: User is logged in; account is active; daily deposit limit not reached; OTP service available.

Steps:

1. Navigate to "Deposit Funds" page.
2. Select the target account.
3. Enter a valid deposit amount less than the daily limit.
4. Click "Proceed" .
5. Enter the OTP received on registered mobile.
6. Click "Confirm Deposit" .

Expected Result: Deposit is processed successfully; account balance increases by the deposited amount; a confirmation message is displayed.

Needs Improvement:

- Add a step to verify the OTP is sent successfully before proceeding.
- Clarify the expected result for the confirmation message.

Test Case ID: TC_DEPOSIT_002
Title: Deposit exceeding daily limit (Negative)
Preconditions: User is logged in; account is active; daily deposit limit is set.

Steps:

1. Navigate to "Deposit Funds" page.
2. Select the target account.
3. Enter a deposit amount that exceeds the remaining daily limit.
4. Click "Proceed" .

Expected Result: System displays an error message indicating that the deposit amount exceeds the daily limit; no further action is allowed.

Needs Improvement:

- Specify the expected error message for clarity.

Test Case ID: TC_DEPOSIT_003
Title: Deposit with invalid amount (negative value) (Negative)

Close

Test Case ID: TC_DEPOSIT_001

Title: Successful deposit within daily limit (Positive)

Preconditions: User is logged in; account is active; daily deposit limit not reached; OTP service available.

Steps:

1. Navigate to “Deposit Funds” page.
2. Select the target account.
3. Enter a valid deposit amount less than the daily limit.
4. Click “Proceed” .
5. Enter the OTP received on registered mobile.
6. Click “Confirm Deposit” .

Expected Result: Deposit is processed successfully; account balance increases by the deposited amount; a confirmation message is displayed.

Needs improvement:

- **Add a step to verify the OTP is sent successfully before proceeding.**
- **Clarify the expected result for the confirmation message.**

Test Case ID: TC_DEPOSIT_002

Title: Deposit exceeding daily limit (Negative)

Preconditions: User is logged in; account is active; daily deposit limit is set.

Steps:

1. Navigate to "Deposit Funds" page.
2. Select the target account.
3. Enter a deposit amount that exceeds the remaining daily limit.
4. Click "Proceed".

Expected Result: System displays an error message indicating that the deposit amount exceeds the daily limit; no further action is allowed.

Needs improvement:

- **Specify the expected error message for clarity.**

Test Case ID: TC_DEPOSIT_003

Title: Deposit with invalid amount (negative value) (Negative)

Preconditions: User is logged in; account is active.

Steps:

1. Navigate to "Deposit Funds" page.
2. Select the target account.
3. Enter a negative deposit amount (e.g., -100).
4. Click "Proceed".

Expected Result: System validates the amount and shows an error message stating that the deposit amount must be positive; deposit is not processed.

Needs improvement:

- Specify the expected error message for clarity.

Test Case ID: TC_DEPOSIT_004

Title: Deposit equal to daily limit (boundary condition) (Positive)

Preconditions: User is logged in; account is active; remaining daily limit equals the intended deposit amount.

Steps:

1. Navigate to “Deposit Funds” page.
2. Select the target account.
3. Enter a deposit amount equal to the remaining daily limit.
4. Click “Proceed” .
5. Enter the OTP received on registered mobile.
6. Click “Confirm Deposit” .

Expected Result: Deposit is processed successfully; account balance increases accordingly; daily limit is now reached; a confirmation message is displayed.

Needs improvement:

- Clarify the expected result for the confirmation message.

Test Case ID: TC_DEPOSIT_005

Title: Deposit fails due to network error (Negative)

Preconditions: User is logged in; account is active; network connectivity is unstable.

Steps:

1. Navigate to “Deposit Funds” page.
2. Select the target account.
3. Enter a valid deposit amount.
4. Click “Proceed” .
5. Simulate network failure before OTP is received.

Expected Result: System displays a network error message; deposit is not processed; user is prompted to retry after restoring connectivity.

Needs improvement:

- **Specify the expected error message for clarity.**
